

SunFrame POD HOUSE

Build Any Space Anywhere

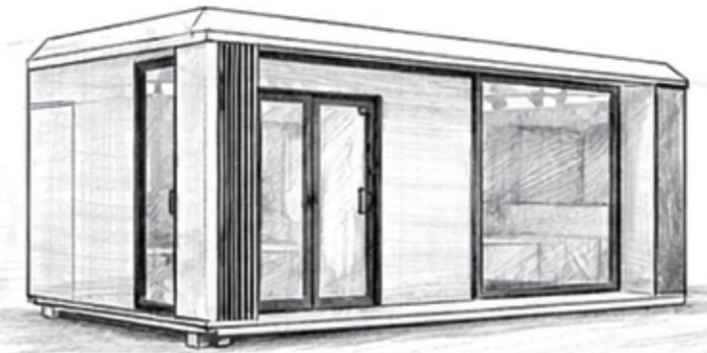

Folded Frame → Crane Expansion

Install Wall Panels

Ready-to-Use Pod House

Sunframe Pod House is a modular living space designed for flexibility and fast installation.

To reduce installation time and construction costs, the wall, floor and roof components are modularized during factory production.

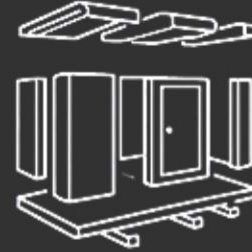

The structure can be quickly assembled by just two people.

Each wall module can be easily replaced with doors or windows, allowing the space to adapt to future needs.

A flexible modular space designed for living, business and creative environments.

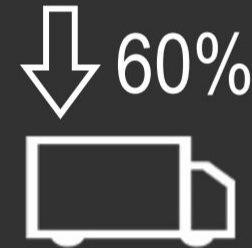

SunFrame
POD HOUSE

KEY ADVANTAGES

Modular Design

Create flexible spaces with interchangeable modules.

Reduced Shipping Cost

Flat-pack panels lower transport volume by up to 60%.

Fast Installation

Assembled by 2 workers in 2 days, no welding required.

MODULAR SPACES FOR EVERY IDEA

Sunframe Pod House's design allows units to be combined in multiple ways. Connect modules side by side or expand layouts based on your project needs. From a single pod to a multi-unit complex, the possibilities are endless.

Coffee Shop

Pop-up Store

Ice Cream Shop

Temporary Office

LOWER LOGISTICS COST

Traditional space capsule

- ✗ One-piece transport
- ✗ Requires heavy-duty truck
- ✗ Difficult inland delivery

↓ 60%

Sunframe Pod House

- ✓ Flat-Pack Panel Transport
- ✓ 3–4 Units per Container
- ✓ Small Truck Delivery
Easy Access to Narrow Roads

FAST & EASY INSTALLATION

Suitable for multiple environments

Faster project delivery

3 DAYS INSTALLATION

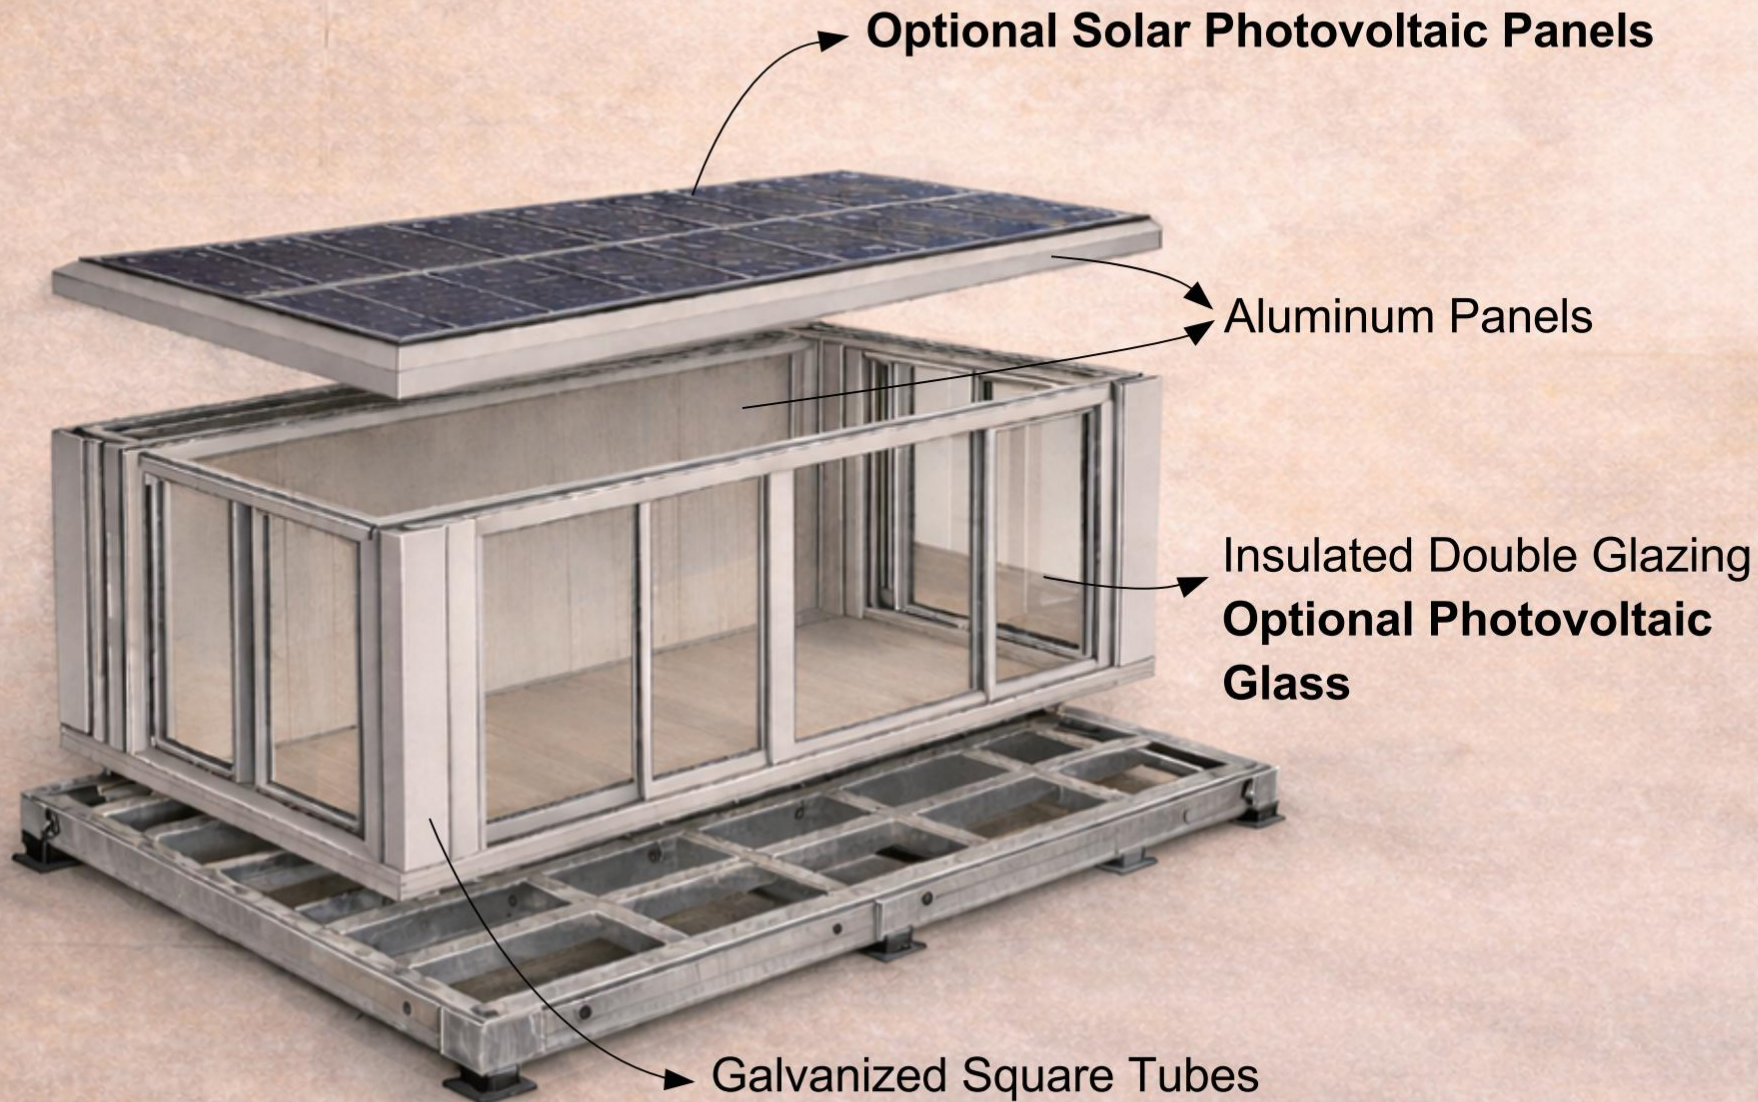

No Welding
Bolt Connection

No Skilled
Workers Required

2-4 Workers
Easy to Install

Lightweight
Standard Crane Required

ENGINEERED STRUCTURE

Energy Solution

Solar panels can be added on the roof. Glass can be upgraded to photovoltaic glass. Suitable for remote areas without stable electricity

Waterproof & Sealing System

IP68 waterproof rating. Optional seawater desalination system available for coastal use Modular Panel System

Aluminum Structure

High-strength aluminum frame
Lightweight, corrosion-resistant, and built for long-term durability

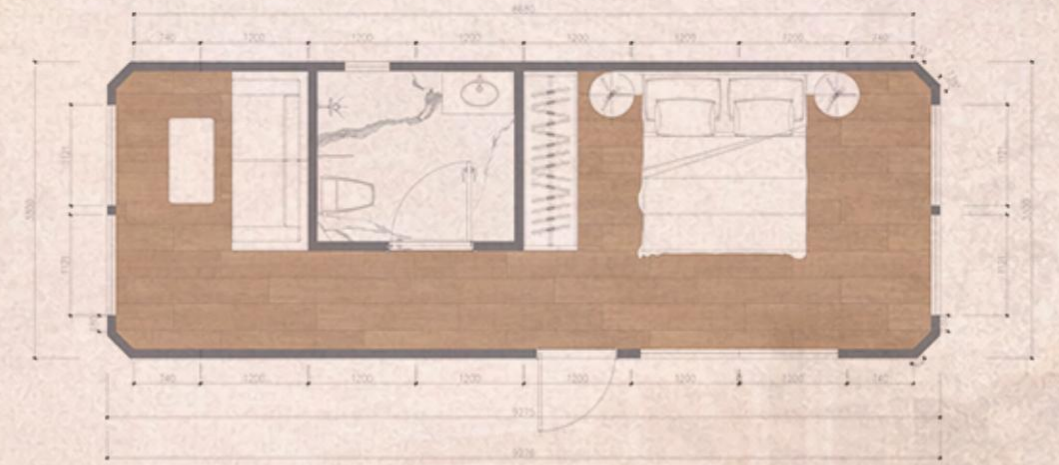

Surface Finishes & Material Options

Multiple surface finishes to suit diverse aesthetics
Designed for flexibility across different applications
